THE ELEGANT WOODEN BATHTUB EXCLUSIVE PIECES THAT TAKE YOUR BREATH AWAY

WAVE Diamond - Photography by Bagno Sasso

Sweet and warm, the flowery print on this Swedish mosaic design gives it an exceptionally antique feel, like something you could have inherited from your great grandmother. Designed by **Solklippa & Skogh**, the claw feet in **Karbad** transform it from a classic design to a modern masterpiece, all the while letting it retain its warm antique persona. Bringing joy, the typical Swedish Summer flowers give the design a timeless and joyful effect; along with the claw feet it takes novelty to a whole new level.

Sophisticated and unique, **Disambigua** by Flavio Scalzo for **DiciannoveDieciDesign** is efficient because it requires very small space and can be placed in a bathroom or even in the middle of a room. With the rotating and plumbing system invisible disguising the design from being a washbasin, it could pass as a piece of furniture that complements its surroundings nicely. The high-tech bathtub is not only efficient, but is also ready to satisfy one's need for a sensational personal experience that's both comfortable and pleasing.

The Swiss company, **Bagno Sasso**, presents three elegant wooden bathtub collections that take your breath away. For 14 years now, the high-end company has provided the world of design with highly exclusive pieces. Supplying all over the world and winning several awards, the company is known for its exceptional creativity in design.

With great design, a simple activity such as bathing can be transformed into something a lot more; a spiritual experience with the Vascabarca, a time machine to the beautiful past with the Karbad or a boat into paradise with the wooden elegant designs by Bagno Sasso, and a lot more. Bathing has become a sensational experience due to the creativity of those design masterminds! ■
